

Kid's NeuroVite (100 capsules)
\$16.99

Take the guess work out of what multivitamin to use for your kids. Studies show that a high percentage of children in North America and other developed countries eat less than the minimum daily allowance of many essential nutrients. Adequate amounts and proper balance of these nutrients are needed for maintaining good health and for satisfying the special nutritional demands of growth and development during childhood.

Daniel Amen, M.D., the author of the New York Times best seller “Change your Brain, Change your Life”, recommends chewable Kid's NeuroVite to meet the developmental needs of growing children.

- Kid's NeuroVite is more than just another children's multivitamin/mineral supplement. Compared to major brands of children's chewable multivitamins, it provides several times the levels of the important antioxidant vitamins C and E.
- Kid's NeuroVite also delivers significantly more than the levels of most B-vitamins of brand-name vitamins and provides easily absorbable calcium and magnesium.
- Kid's NeuroVite uses only the purest, most hypoallergenic ingredients and contains no artificial colors, flavors or preservatives.
- Kid's NeuroVite is flavored with natural orange mango fruit juice and sweetened with fructose, sucrose and sorbitol.

Kid's NeuroVite is ideal for children who are at risk for vitamin, mineral and trace element deficiencies due to sub-optimal dietary intake and life style.

Servings per Container: 50

Two capsules contain:

- Vitamin A 3500 I.U. (29% as Vitamin A/71% Natural Betatene supplying natural mixed carotenoids including Alpha & Beta-Carotene, Zeaxanthin & Cryptoxanthin)
